Bio 103

Science Article Exploration

In this assignment, we will be exploring a current science article and trying to learn to think critically about the research and how it can apply to our everyday lives. Please read the instructions below and answer the questions completely. Partial answers will only receive partial credit!

1. What do you think is the main point of this article? Describe what this article is trying to convey in a paragraph. DO NOT PLAGIARIZE.

2. What is one way that this article could apply to your every day life? Do you think this research is important?

3. If you were going to share this with your family or friends, how would you tell this story so they could understand it?

4. If you were a research scientist studying this topic, what would your next experiment be?

5. If you could think of one Facebook headline for this article to try to get people to read it, what would it be?
